

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

ALPHABETICAL CATALOGUE
OF THE
LIBRARY OF CONGRESS.

AUTHORS.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1864.

NOTE.

The last general catalogue of the Library of Congress was issued in 1861, and embraced the accessions to the close of the year 1859. Four general catalogues, besides numerous annual supplements, had been published previously; viz., in 1815, 1831, 1839, and 1849, respectively. Since the last issue, in 1861, nearly twenty thousand volumes have been added to the Library, and five annual supplements to the catalogue have been issued. To consolidate all these catalogues into a single volume, and to facilitate reference by reducing the multifarious alphabets of former general catalogues to one alphabetical arrangement, is the object of the present volume.

All former general catalogues of this Library have been arranged upon a system of classification prepared by Thomas Jefferson, and based upon Lord Bacon's division of knowledge. This classification, however well adapted, in some respects, to a small library, like that of Mr. Jefferson when adopted in 1815 as the basis of the present collection, is wholly unsuited to the necessities of readers consulting a large library. It was never designed by its author as a bibliographical system, but rather as a scientific arrangement of the various

branches of human knowledge. No further illustration of its defects need be given than the fact that in the last catalogue of the Library of Congress the titles are distributed through a series of one hundred and seventy-nine distinct alphabets, arranged in an arbitrary sequence, and without an index. Few readers have the leisure and fewer still the inclination, to study the intricacies of such a system of classification. In abandoning it for a more simple method, the officers of the Library are assured that they have consulted the convenience as well as the wishes of Congress, and of other frequenters of the Library.

In the arrangement of any catalogue of books, the chief desideratum, next to accuracy of description, is facility of reference, and to this end all minor considerations should be sacrificed. This volume embraces the present contents of the Library, arranged in all cases under the names of the authors, when known, anonymous works being entered, for the most part, under the leading word of the subject they treat of. This method, while it is a departure from the more uniform rule of entering anonymous works under the first word of the title, as practiced by some bibliographers, is unquestionably of greater utility to the general reader, and is not without high bibliographical authority.

To complete the plan adopted, the present alphabetical catalogue of authors will soon be followed by an analytical catalogue of subjects, also arranged alphabetically, and covering the whole field which the works embraced in the present volume illustrate. Those consulting the library will thus have before them the means of determining, by a single reference, whether the Library contains any work, if the author's name is known; and also, by a single reference, whether it contains any book of which the subject is known.

LIBRARY OF CONGRESS, *September*, 1864.
